

Anastasia Lisovyk

Low-Code Developer

AI-powered Full-Stack Low-Code Architect

Certified in low-code platforms and actively integrating AI tools such as Claude, GitHub Copilot, and OpenAI Codex into development workflows to improve productivity, code quality, and delivery speed

Employment History

Research & Development (R&D) / No-Code Developer at ICEO LTD.

DEC 2023 – FEB 2026

Worked on early-stage startup projects, focusing on idea and product feasibility validation. Conducted research and analysis to assess the viability of startup concepts from both technical and product perspectives.

Key responsibilities included:

- Evaluating startup ideas and projects for feasibility and scalability
- Conducting market and product research
- Designing and building interactive prototypes
- Testing and iterating prototypes based on feedback
- Rapid validation of assumptions through MVPs and proof-of-concepts

After the studio phase, continued working on internal and client projects by:

- Developing landing pages for products and startups
- Translating business ideas into functional no-code solutions

Tools & platforms: Bubble, Webflow, n8n (automation), no-code / low-code tools

Software Developer (Bubble.io Developer) at Asumma Homes

FEB 2023 – NOV 2023

- Developed and maintained custom Bubble application to support core product workflows and user-facing features.
- Optimized application performance and responsiveness to improve user experience across devices.
- Designed intuitive user interfaces and managed database schemas to ensure data integrity and scalability.
- Automated workflows and integrated third-party services (APIs, payment
